

KAITA Living LV public bond issue

This Investor Presentation is neither considered as prospectus as defined in Regulation No. 2017/1129, nor Information Document as defined under the Law on Securities of the Republic of Lithuania. Moreover, this presentation is not approved by any financial supervision authority of the Republic of Lithuania as well, or any securities regulation authority of any other jurisdiction as such.

This material is provided to you for information purposes only. You should not rely upon it or use it to form the definitive basis for any decision, contract, commitment or action whatsoever. KAITA LV LIVING SIA (the Company or Issuer) has taken all reasonable care to ensure that the information contained in this presentation is reliable, but no guarantees, warranties or representations are made as to the accuracy or completeness of the information contained in this document.

This presentation includes description of the Company and its subsidiaries (together – the Group). It is furnished to you solely for your information and you may not reproduce it (or any part of it) or redistribute it (or any part of it) to any other person or otherwise divulge, directly or indirectly, its contents to any person. This presentation does not constitute or form part of, and should not be construed as, an offer, solicitation, financial promotion or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or the Group.

This presentation is intended for discussion purposes only and does not create any legally binding obligations on the part of the Company. This Presentation is not intended to form the basis of a decision to purchase securities or any other investment decision and does not constitute an offer, invitation or recommendation for the purchase of securities. This material is: (i) for your information, and we are not soliciting any action based upon it; (ii) not to be construed as an offer to sell or a solicitation of an offer to buy any security in any jurisdiction where such offer or solicitation would be illegal; and (iii) based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied upon as such. When making an investment decision, you should rely solely on the Information Document and not the summary contained herein.

When reviewing the information, please note that past performance is no guide to or guarantee of future performance. You should be aware that ideas and potential opportunities discussed herein carry risk, that the value of described assets can vary over time, and that potential investors may not get back the full amount invested.

This presentation includes forward-looking statements. These statements may be identified by such words as “aim”, “target”, “expect”, and similar expressions, or by their context. These statements are made on the basis of current knowledge and assumptions and address matters that involve risks and uncertainties. Accordingly, no assurance is given that such forward-looking statements will prove to have been correct. You should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update or correct any inaccuracies which may become apparent after the date of this presentation.

The distribution of this presentation may be restricted by law in certain jurisdictions and persons into whose possession any document or other information referred to herein come should inform themselves about and observe any such restriction. Any failure to comply with these restrictions may constitute a violation of the securities laws of any such jurisdiction.

The transaction mentioned herein may not be appropriate for all individuals and/or investors and before entering into any transaction you should take steps to ensure that you fully understand such transaction and have made an independent assessment of the appropriateness of such transaction in the light of your own objectives and circumstances, including the possible risks and benefits of entering into such transaction. The Company urges all persons considering investment opportunities to seek professional legal, regulatory, accounting, tax or other type of advice, as may be appropriate, on all relevant issues in considering investments in securities.

Overview of SPV real estate asset

03

Central location

5 min. Walk to old town

- Located at Valdemara St. 38, Riga, this property offers easy walking access to the most famous landmarks of central Riga, allowing you to enjoy the vibrant pleasures of an active social life.
- The location boasts excellent connectivity, whether on foot or via public transport. Situated near Riga's central business district, the area is surrounded by offices, shops, cafes, and restaurants, with the scenic Daugava riverbank and Vermanes Garden just a short stroll away.
- Riga's Old Town is recognized as a UNESCO World Heritage site, attracting countless tourists and students every year and creating a uniquely lively urban atmosphere. Due to its prime central location, the property maintains long-term value and is perfectly suited for both investment purposes and personal use.

Old town is a unesco world heritage site

Housing market review in Riga

The 2025 housing market saw a resurgence in activity, with rising transaction volumes and mortgage originations. The Confidence Index recorded consistent month-on-month growth in transactions, demand and pricing, while the time needed to sell a home continued to decline, as shown below.

Housing Market Confidence Index

+20%

Avg. gross salary growth, Q1 2023 → Q1 2025 (EUR 1 462 → EUR 1 757)

+9%

New-build 2-room apartment price growth in Riga neighbourhoods, to EUR 2 535/m² (Q1 2025)

2 250 – 5 500+EUR/m²

Price range 2025/26 — Riga neighbourhoods to prime Old Town & riverfront (Riga Waterfront, Centrus)

The overall transaction amount of small apartments trend shows that the demand is in place. The key market driver – affordability, which is based on overall lower price per apartment.

Number of transactions for apartments of 18-25 m², in new projects and pre-war houses in Riga

About project

Risk factors

06

The following is a disclosure of certain risk factors that may affect the Issuer’s ability to fulfil its obligations under the Bonds. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, factors which are material for the purpose of assessing the risks associated with the Bonds are described below. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Bonds, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bonds may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to the Issuer or which it may not currently be able to anticipate. Prospective Investors should also read the detailed information set out elsewhere in this Information Document and reach their own views prior to making any investment decision.

Before deciding to purchase/subscribe the Bonds, Investors should carefully review and consider the following risk factors and other information contained in this Information Document. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders’ equity, net assets, financial position and financial performance of the Issuer or the Group. Moreover, if any of these risks occur, the market value of the Bonds and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Bonds may decrease, in which case the Bondholders could lose all or part of their investments. Additional risks and uncertainties, which are not currently known to the Issuer or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer and/or the Group and have a material adverse effect on their cash flows, financial performance and financial condition. The order in which the risks are presented does not reflect the likelihood of their occurrence or the magnitude of their potential impact on the cash flows, financial performance and financial condition of the Issuer and/or the Group.

Issuer's business risk factors

Risk factor	Description
Changes in Issuer’s financial standing	The Issuer is a limited liability company established for the purposes of development of the real estate project at K. Valdemara st. 38, Riga (the “Project”), with the share capital of EUR 2,800. Based on the Issuer’s audited annual financial statements for the financial year ended 31 December 2025, the own capital of Issuer is EUR -17,657 (minus seventeen thousand six hundred fifty seven euros) which is composed of the share capital of EUR 2,800 and undistributed profit of EUR -20,457 (minus twenty thousand four hundred fifty-seven euros) and minority interest EUR 0. The undistributed profit was accumulated due to re-evaluation of the assets owned by the Issuer and result of typical activities. The real estate assets owned by the Issuer were acquired from the funds lent to the Issuer by KAITA Group companies. Any adverse change in the Issuer’s financial condition or prospects, including reduced cash flows from the SPV, may have a material adverse effect on the liquidity of the Bonds, which may lead to a significant decrease in the market price of the Bonds, or may render the Issuer unable to fully redeem the Bonds, which may lead to investors losing part or all of their invested funds.
Liquidity risk	Liquidity risk is the risk that the Issuer is unable to maintain a sufficient reserve of cash and other liquid financial assets that can be used to meet its payment obligations as they fall due and to redeem the Bonds. The Issuer is a holding company dependent on SPV asset sale income and KAITA Group to support liquidity. The Issuer may receive funds through dividends from the SPV if part or all assets being sold and projected covenants according to loan agreements are outperformed. However, receiving dividends is subject to financial institutions prior consent and it may result in delay or absence of dividends. In addition, the SPV has entered into financing arrangements with a bank acting as the senior creditor, the terms of which grant the bank priority in respect of the Issuer's cash flows and assets. As a result, the timing and amount of funds that may be distributed by the SPV to the Issuer depend on the SPV's ability to comply with the requirements imposed by the senior creditor, including repayment obligations, financial covenants and any restrictions on distributions. In the event of non-compliance or enforcement action by the senior creditor, available cash flows at the SPV level may be significantly reduced or become unavailable for distribution to the Issuer. Availability of liquidity for business activities and for fulfilling Issuer’s obligations also depends on ability to access financing, through attracting financial partners, loans or funding from banks. Financing process could take longer or not occur due to market conditions or other reason which may result in inability of the Issuer to meet its payment obligations in cash, whether scheduled or unscheduled. Although the Issuer monitors its liquidity position and follows procedures to manage liquidity risk, a reduction in the Issuer's liquidity position could have a material adverse effect on the Issuer's business, financial condition, results of operations or prospects, as well as ability to redeem the Bonds at their maturity.

Risk factor	Description
Real estate market and affordability risk	Currently, the source of funds to be used for the redemption of Bonds is the sale income of Project apartments in two years. Thus, a potential downturn in the Latvian real estate market, various economic factors (including geopolitical situation, pandemics, quarantines, etc.) could negatively impact real estate prices or apartment sale speed and transaction volumes. This would adversely affect income from sale of apartments as well as limit the ability to sell the properties, impact the SPV's performance and financial condition, and would reduce the value and liquidity of SPV's assets. In addition, Latvia and other European economies have faced excessive inflation in the years 2022–2023. Though expected to subside in the upcoming years in 2026–2028, inflation could still be significantly higher than historic average levels. This could result in the European Central Bank raising and keeping interest rates at high levels, which would affect the affordability of buying real estate and could lead to an affordability crisis if wages do not increase at the same pace or the cost of living increases significantly. Growing inflation in the future may prevent the Issuer from offering competitive pricing of its apartments or decrease the demand for its services due to competition in the market, and respectively prevent the Issuer from preserving its existing profit margin or may lead to losses. The Issuer's expenditures would increase considerably due to inflation and the Issuer would have to cover its increased costs from internal resources, unless it manages to increase its prices. Thus, significant fluctuations in real estate prices and strong inflation may have a considerable adverse influence on the Issuer's financial situation, business results, profitability and solvency.
Rental market and vacancy risk	Until the apartments are sold, rental income constitutes the primary source of operating cash flows. The SPV's target tenant demographics, including international students and young professionals, are particularly sensitive to macroeconomic conditions. Economic downturns in students' home countries can affect their ability to study abroad or relocate for work, impacting occupancy rates and rental prices at the SPV's rental facilities. In economic downturn cycles the target client groups tend to cut costs and look for cheaper alternatives which might impact the pricing of the SPV's services and occupancy level at the SPV's accommodation facilities and coworking premises. In addition, increased perception of the geopolitical risk among the target clients due to the war between Russia and Ukraine might impact their willingness to use accommodation and coworking services at the SPV's facilities which would impact the rental price and occupancy level. Furthermore, changes in visa regulations or immigration policies can directly impact the influx of international students and professionals. Stricter policies may lead to reduced demand for rental units and create occupancy risk. Any of the above factors, individually or in combination, could result in lower rental income for the SPV and, consequently, adversely affect the Issuer's cash flows, financial condition and ability to meet its obligations under the Bonds.
Risk related to the sale of leased residential units	Certain residential units owned by the SPV may be leased to tenants at the time of their sale. Where prospective purchasers wish to acquire such units without tenants in place, the SPV may need to seek the termination or early expiry of the relevant lease agreements prior to completion of the sale, subject to the applicable laws and the terms of the respective lease agreements. There can be no assurance that such arrangements will be achieved on acceptable terms or within the expected timeframe. As a result, the SPV may incur additional costs (including potential compensation to tenants), experience delays in completing property sales, or face disputes with tenants. In addition, diverse tenant communities could react differently to the SPV's initiatives, and tenants from different countries could create social or cultural tensions among potential buyers or new owners if cultural differences are not managed effectively. The SPV's ability to ensure that new owners and tenants comply with local regulations related to silent hours, public order and cleanliness is also a relevant factor. Any such circumstances could adversely affect the SPV's and Issuer's revenues, cash flows, financial condition and results of operations.

Risk factor	Description
Unaudited Issuer’s Stand-Alone Financial Statements	The stand-alone Financial Reports of the Issuer regarding financial years ended 31 December 2024 is unaudited because the Issuer had no obligation to audit stand-alone Financial Reports pursuant to the applicable law. In addition, the stand-alone Financial Reports of the SPV for the financial year ended 31 December 2024 are unaudited, as the SPV had no obligation to audit its stand-alone Financial Reports pursuant to the applicable law. Thus, the investors should be aware that stand-alone Financial Reports of the Issuer and the SPV for the financial year ended 31 December 2024 are unaudited and may contain errors or inaccuracies. Notwithstanding the foregoing, the Issuer took an obligation from fiscal year 2026 to prepare annual audited Financial Reports of the Issuer and publish them on the Issuer’s website during the maturity of the Bonds (see Clause 13(h) of the General Terms and Conditions).

KAITA Group specific risk factors

Risk factor	Description
Dependence on KAITA Group personnel and third-party service providers	Due to the nature of its business, neither the Issuer, nor the SPV employ staff. The success of the SPV depends on the employees of KAITA Group. There is no guarantee that it will be possible to retain all the existing people who are crucial to the management of the SPV or to recruit new professional staff. The loss of people critical to the success of the SPV's business, possibly through transfer to the SPV's competitors, and the inability to attract new qualified personnel, could have a material adverse effect on the SPV's management, operations, results of operations and financial condition. In addition, as neither the Issuer nor the SPV directly manage the apartment sales process, day-to-day operations, or maintenance of the properties, both entities rely heavily on external service providers, including affiliated companies within the KAITA Group, to ensure the quality and continuity of apartment sales, property management, maintenance, and tenant-related services. Key operational functions such as facility maintenance, repairs, cleaning, security, utilities management, and tenant support are outsourced to third-party providers. The performance, cost-effectiveness, and reliability of these service providers are critical to sustaining tenant satisfaction, occupancy levels, and the overall financial performance of the rental projects. Any failure by the service providers to meet required standards, delays in service provision, staff shortages, or contractual disputes may lead to operational inefficiencies, tenant dissatisfaction, increased vacancy rates, and additional unforeseen costs for the SPV. Furthermore, reputational damage resulting from poor service quality may affect the long-term attractiveness and value of the rental properties. While the Issuer actively manages the risks associated with external service providers, including through KAITA Group's ownership of one of the leading real estate management service providers (Youston), any failure in their performance could impact project timelines, service quality, and reputation, which could adversely affect the Issuer's financial condition and ability to meet its obligations.

Risk factor	Description
Construction cost	Notwithstanding, the SPV has finished the construction works in Youston Riga and fully furnished all apartments, the SPV has planned to transform part or all other premises or common areas into apartments or separate units which will be sold as well. KAITA Group employees and people invoked all available information and analytical resources when planning operations, however there is no guarantee, that all information on which the planned investments in Project will not change due to market or other conditions and will materialize as planned. KAITA Group has extensive construction market suppliers’ knowledge and using reliable and proven contractors that deliver works and services across all development projects. However, as the situation in global markets and building materials supply chain is changing frequently, by the time of completion of the Project and key variables regarding which investments assumptions have been made, could significantly change and adjustments to the initial calculations might be required in the later stages of the expansion Project due to reasons indicated above. An unexpected increase in construction costs or inability to secure construction material required to complete the Project may reduce the overall profitability and affect SPV's retained profit. As a result, this could adversely affect the Issuer’s financial situation and ability to redeem the Bonds. Even if economic and geopolitical situation would stabilize until completion of the Project, there is no guarantee the investments made will generate anticipated or planned return on the Project. Moreover, neither KAITA Group nor KAITA Development companies may provide any assurance that there will not be any disputes with its suppliers or that it will be able to maintain business relationships with its existing suppliers. Any disruption to the supply chain as a result of an issue with a supplier, or any damage to such supplier’s integrity could cause significant time and expense in remediation of any deficiencies and could impact on its reputation, which could adversely affect its reputation and profitability.

Risk factors related to the Bonds

Risk factor	Description
Credit and Issuer’s default risk	Any person who purchases the Bonds is relying on the financial status of the Issuer, but the respective persons shall have no rights against any other person. Thus, Credit risk should be evaluated as a possibility that the Issuer might become insolvent, go bankrupt, its business being suspended or terminated, and as a result, it would be impossible to redeem the Bonds and/or pay the accrued interest to the Bondholders. Moreover, should the Issuer become insolvent, legal protection proceedings or out-of-court legal protection proceedings of the Issuer are initiated during the term of the Bonds, an investor may forfeit interest payable on, and the principal amount of, the Bonds in whole or in part. An investor is always solely responsible for the economic consequences of its investment decisions. The Bonds constitute direct, unconditional, and unsubordinated obligations of the Issuer, which will at all times rank pari passu without any preference among themselves and at least pari passu with all other present and future unsecured obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application. In addition to that no state guarantee (insurance) is applicable in case of non-redemption of the Bonds. In addition, even if the likelihood that the Issuer will be in a position to fully fulfil all obligations under the Bonds when they fall due actually has not decreased, the market participants could nevertheless be of that opinion. In particular, the market participants may in particular be of such opinion if market participants’ assessment of the creditworthiness of corporate debtors in general or debtors operating in the industries sector adversely changes. If any of these risks occur, the third parties would only be willing to purchase Bonds for a lower price than before the materialization of said risk. The market value of the Bonds may therefore decrease.

Risk factor	Description
Risks related to the enforceability, validity and sufficiency of the Collateral	The Bonds will be secured by the first ranking pledge of shares of the SPV and the first ranking pledge of the Dedicated Account in 45 days after the Issue Date (see Clause 6(d) Collateral of the General Terms and Conditions of the Bonds Section 4.2 below). Nonetheless, the SPV is incorporated under the laws of the Republic of Latvia, therefore the validity and enforceability of the pledge arrangements are subject to the requirements and limitations imposed by Latvian law. Under Latvian law, a company must act in its own commercial interest. Where a pledge is granted in respect of obligations of another group company, Latvian courts may assess whether such transaction provides sufficient benefit to the granting entity. If it is determined that the pledge was not in the commercial interest of the relevant entity, or otherwise violates mandatory provisions of Latvian law, it may be declared void or voidable in whole or in part. In such circumstances, the Bondholders may lose the benefit of the pledged shares of the SPV. In addition, no real estate mortgage securing the Bonds will be in place until the Senior Creditor loan has been repaid in full. Thus, the Bondholders will have no priority claim against the underlying real estate. Thus, in the event of the insolvency of the SPV, its assets will be used primarily to satisfy the claims of Senior Creditor whose claims are secured by the pledge and mortgages of the SPV's assets. Even after the discharge of the Senior Creditor and the establishment of the real estate mortgage of the SPV's assets, there is no assurance that the value of the Collateral will be sufficient to satisfy all claims of the Bondholders in full. Furthermore, in case of enforcement on the Collateral, the costs of enforcement, including the expenses of the Trustee, will have to be covered by the proceeds of the sale of the Collateral prior to claims of the Bondholders. The procedure of enforcement on Collateral may also delay settlement with the Bondholders. Therefore, the pledge and collateral to be provided in the future does not guarantee that, in the event of a default by the Issuer, the Collateral will be capable of being realised in a timely manner and at a sufficient value, or that the liquidation proceeds of the Collateral will be sufficiently high to satisfy in full all the claims of the Bondholders.
Amendments to the Bonds bind all Bondholders	The Law on Protection of Interests of Bondholders requires and the terms of the Bonds contain provisions for calling Bondholders’ Meetings to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Bondholders, including Bondholders who did not attend and vote at the relevant Bondholders’ Meetings and Bondholders who voted in a manner contrary to the majority. This may incur financial losses, among other things, to all Bondholders, including such Bondholders who did not attend and vote at the relevant Bondholders’ Meetings and Bondholders who voted in a manner contrary to the majority.
Interest rate and inflation risk	If interest rates in general or particularly with regard to obligations of corporate debtors or corporate debtors with activities in the industries sector for durations equal to the remaining term of the Bonds increase, the market value of the Bonds may decrease. The longer the remaining term of a debt instrument, the stronger its market value is affected by changes in the interest rate level. There are further factors which may affect the market value of the Bonds, including, but not limited to global or national economic factors and crises in the global or national financial or corporate sector. Bondholders should be aware that movements of the market interest rate can adversely affect the market price of the Bonds and can lead to losses for the Bondholders if they sell their Bonds. In addition, there is a risk of future money depreciation due to inflation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on the Bonds. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

Risk factor	Description
An active secondary market for the Bonds may not develop	The Bonds constitute a new issue of securities by the Issuer. Prior to Admission to trading on First North, which is an alternative market in Lithuania, there is no public market for the Bonds and other securities of the Issuer. Although application(s) will be made for the Bonds to be admitted to trading on First North, there is no assurance that such application(s) will be accepted, and the Bonds will be admitted to trading. In addition, Admission to trading the Bonds on an alternative market will not guarantee that a liquid public market for the Bonds will develop or, if such market develops, that it will be maintained, and neither the Issuer, nor the Lead Manager is under any obligation to maintain such market. If an active market for the Bonds does not develop or is not maintained, it may result in a material decline in the market price of the Bonds, and the liquidity of the Bonds may be adversely affected. In addition, the liquidity and the market price of the Bonds can be expected to vary with changes in market and economic conditions, the financial condition and the prospects of the Issuer, as well as many other factors that generally influence the market price for securities. Accordingly, due to such factors the Bonds may trade at a discount to the price at which the Bondholders purchased/subscribed the Bonds. Therefore, investors may not be able to sell their Bonds at all or at a price that will provide them with a yield comparable to similar financial instruments that are traded on a developed and functioning secondary market. Further, if additional and competing financial instruments are introduced on the markets, this may also result in a material decline in the market price and value of the Bonds.
Early redemption risk	According to the General Terms and Conditions of the Bonds, the Bonds may be redeemed prematurely on the initiative of the Issuer: (i) within the period of 12 (twelve) months after the Issue Date but not later than 6 (six) months before the Maturity Date, with the respective Early Optional Redemption Amount equal to 102% of Nominal Amount plus accrued Interest; (ii) within the last 6 (six) months before the Maturity Date, with the respective Early Optional Redemption Amount equal to 100% of Nominal Amount plus accrued Interest, as described in the General Terms and Conditions of the Bonds. The Issuer may choose to redeem the Bonds, subject to certain regulatory conditions and approvals, at times when prevailing interest rates may be relatively low. In such circumstances a Bondholder may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Bonds and may only be able to do so at a significantly lower rate. Therefore, if this early redemption right is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated. In addition, this optional redemption feature is likely to limit the market value of the Bonds. During any period when the Issuer may, or is perceived to be able to, elect to redeem the Bonds, the market value of the Bonds generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.
Taxation of Bonds	Potential purchasers/subscribers and sellers of the Bonds should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Bonds are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for financial instruments such as the Bonds. Potential investors are advised to ask for their tax advisers’ advice on their individual taxation with respect to the acquisition, sale and redemption of the Bonds. Only these advisors are in a position to duly consider the specific situation of the potential investor.
